REMOTE FUNCTIONS

Power Key: Press this Key to Turn OFF the fan

ON Key: Press this Key to Turn ON the fan. The fan will start rotating at its last stored speed.

Smart Key: When you press this key, the fan will progressively slow down. The power usage will decrease by 150mW every 2 minutes until the speed reaches and stabilises at Speed 1. Later, the fan will operate at this speed indefinitely until it is turned off. The Smart feature is disabled if the fan is in step 1 or 2.

1 Key: Press this Key to run the fan at speed step 1.

2 Key: Press this Key to run the fan at speed step 2.

3 Key: Press this Key to run the fan at speed step 3.

4 Key: Press this Key to run the fan at speed step 4

5 Key: Press this Key to run the fan at speed step 5.

6 Key: Press this Key to run the fan at speed step 6.

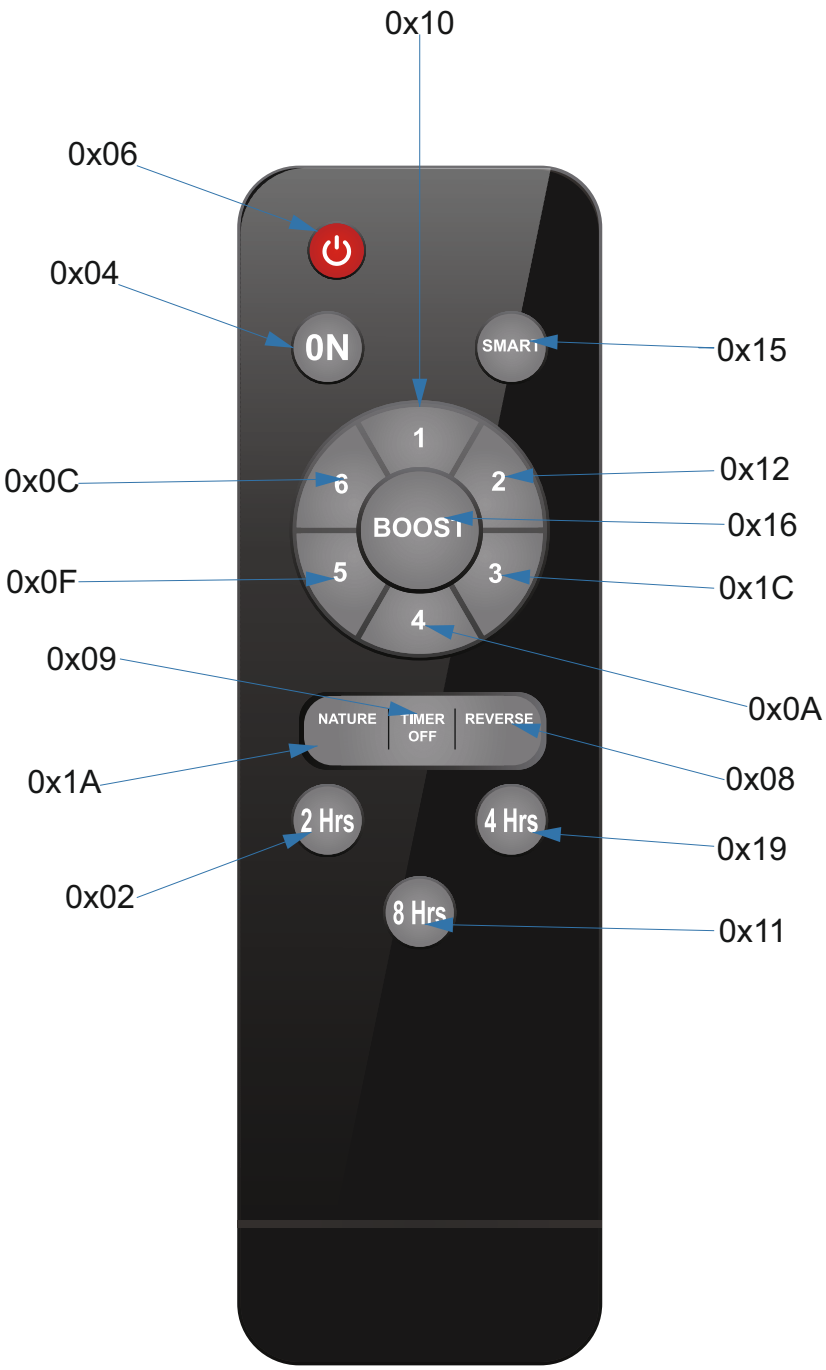
Boost Key : Press this Key to run the fan at boost speed

Nature Key Press this key to automatically increase and reduce the fan speeds, which will then be repeated automatically. The step change occurs at intervals of 30 seconds to simulate natural wind movement. To exit the Nature function, press any of the speed keys.

Reverse Key : Press this Key to switch the direction of fan rotation.

2Hrs Key : Pressing this Key will turn OFF the fan after 2Hours of operation.

4Hrs Key : Pressing this Key will turn OFF the fan after 4Hours of operation.

8Hrs Key: Pressing this Key will turn OFF the fan after 8Hours of operation.


Timer OFF Key: Pressing this Key will allow fan to exit from any set timers.
